

## Cambridgeshire (v.cc.19, 29) PRVs

Note that in some cases the PRV boundaries are not the same as the earlier RSV boundaries. The CWS and SSSI boundaries may also be different. The grid reference is approximate, but will include all or part of the PRV. Some potential designations have no records and are not mapped so may not have been used for any PRV. One footpath may have been recorded as a PRV in error. The most recent visit date excludes those where only occasional records were made. The count of RPCC species is of those seen after 2000; some RSVs have not been visited for over 20 years. A few RSVs were designated for a single species. Some of the species counts may not be accurate due to the wide variety of site names in use.

| PRV | RSV   | Name                   | Parish         | Approximate grid reference | Most recent visit | RPCC species | Comment                 |
